Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10, drawn to a recording apparatus, method, program, and computer system.

Group II, claim(s) 11-23, drawn to a recording apparatus, method, program, and computer system.

Group III, claim(s) 24-36, drawn to a recording apparatus, method, program, and computer system.

2. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. The special technical feature of group I is that if the detected width of said recording medium is shorter than the width over which said recording information is to be recorded, then a portion of said recording information, corresponding to the detected width, or to less than the detected width, of said recording medium is recorded onto said recording medium by said recording head. This has the effect of preventing liquid from being ejected outside of the recording medium, thereby reducing liquid consumption and contamination of the recording apparatus.

4. The special technical feature of group II is that the recording apparatus further comprises setting means for setting a size of said recording medium and in that a notice is made when the detected width of said recording medium is different from a width of the size of said recording medium that has been set with said setting means. This has the effect of informing the user when the actual size of the recording medium is different from the intended size, thereby giving the user the opportunity to exchange the recording medium in the recording apparatus before printing is carried out.
5. The special technical feature of group III is that ON/OFF of an operation through which said detection means detects the width of said recording medium is settable. This has the effect of enabling the user to selectively deactivate the width detection operation, thereby saving time.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Goldberg whose telephone number is (571)272-
